Installation for Garage Door

Please read and follow all of the steps below to ensure proper installation.

Products Suggested:

- Radiant **GUARD**® **Double Bubble** radiant barrier products

Materials Needed:

- Tape Measure
- Utility knife or scissors
- Spray adhesive or double-sided tape
- Aluminum foil tape

General Instructions:

1. Unroll bubble insulation and cut to proper length.
2. Adhere bubble insulation directly to the interior wall of garage door with spray adhesive or double-sided tape.
3. But seams and carefully tape seams with aluminum foil tape.
